

# The Ultimate Industrial Deicer / Ice Preventative

 **LIQUID HEAT™**

\* viton seals are recommended when using hand held sprayers

**Liquid Heat makes an immediate, long-lasting impact on your wintertime productivity.**

This tough deicing agent, from **Zircon Industries, Inc.**, safeguards your vital equipment against ice buildup and system shutdown. You can expect top performance even in extreme temperatures as low as  $-45^{\circ}\text{C}$ . Application can be done easily with hand held sprayers\*, but an automated spraying system makes application even quicker and easier, resulting in decreased maintenance costs and man-hours.

**Bearing & Transmission**  
Keeping you InSync® with maximum productivity and profitability.

Staying InSync With Technology

## FEATURES AND BENEFITS:

### Aggregate Applications

Belts	Rollers
Cables	Roofs
Chutes	Switches
Head Pulleys	Tail Pulleys
Hoppers	Truck Beds
Idlers	Walkways

- ↳ **Tremendous de-icing ability** – Outperforms antifreeze.
- ↳ **Long staying power** – Prevents ice barrier for up to 24 hours. Typical antifreeze only lasts a few hours. Depending upon conditions, only one application per shift may be necessary.
- ↳ **Withstands extreme temperatures** – Effective to  $-45^{\circ}\text{C}$ ; far superior to other de-icers.
- ↳ **Environmentally safe** – Non-corrosive, non-flammable, contains no hazardous waste and is OSHA approved.
- ↳ **Permanent shelf life** – Eliminates waste and saves money.
- ↳ **Safe on all surfaces** – Will not damage belts, metal, rubber, wood, concrete or asphalt.
- ↳ **Automated spraying system** – Saves on maintenance costs, eliminates consistent problem areas and maximizes plant productivity.

Authorized Distributor:

A product of:

# Make an immediate impact on your wintertime productivity.

Is Available in :

**5 Gallon Pails**  
**Part Number LHC005**

**55 Gallon Drums**  
**Part Number LHC055**

**330 Gallon Totes**  
**Part Number LHC330**

## Testimonials

"Very useful in  $-18^{\circ}\text{C}$  or lower temperatures. Liquid Heat™ removed ice and frozen buildup immediately and prevented coal from sliding backwards down the belt."

- Montana

"Liquid Heat™ kept all our belts free from freeze buildup and enabled us to keep operating when other plants in the area were down because of cold temperatures. The products we used in the past were ineffective once we reached single digit temperatures. Liquid Heat™ not only worked well in these conditions, but it also removed the icy buildup left behind by other products."

- Pennsylvania

"The price per application is comparable to or better than antifreeze, with better results."

- Minnesota

"With Liquid Heat™, we had no coal slippage even at  $-32^{\circ}\text{C}$  and wind chills down to  $-62^{\circ}\text{C}$ . It prevented ice buildup and kept the chutes open. Our probes become covered with frost and cease to operate. Simply spraying them once a day with Liquid Heat™ keeps them operating."

- Iowa

"Liquid Heat™ works great in our distribution system, even in very cold weather ( $-23^{\circ}$  to  $-26^{\circ}\text{C}$ ) when other de-icers start to gel."

- Ohio
